Globally recognised technology in our most compact unit yet ...

Flexeserve Zone Lite features our unique and patented 3D convection technology – recognised across the globe as the pioneering system for true hot-holding.

Designed specifically for convenience stores, supermarkets and cafés, Lite offers unmatched portability, versatility and true hot-holding for operations of all sizes.

Unlock micro markets for major sales

Lite truly shines as part of an attractive micro market, enabling shoppers to quickly find convenience items in one location, boosting efficiencies and the customer experience.

Entice customers into further impulse purchases by using Lite to showcase items such as warm cookies and hot doughnuts to increase basket spend. Or feature limited time offers, to supercharge your sales, right at the cash desk.

Get more out of your technology with Flexeserve Solution

Flexeserve Solution is the industry's only hot-holding service and enables you to exceed your hot food goals efficiently, sustainably and profitably.

Only our experts can guide you through the 6-key elements of 'true hot-holding', ensuring that our technology integrates into your operation seamlessly. Ready to sell more and waste less? Talk to our team today.
