

Model: GHC36-J

### Features:

- Frame made of high grade well polished 304 stainless steel
- Computer control, precise temperature regulation, rapid temperature recovery
- IoT features
- Thermostatic control up to 300 °C, allowing adjustment based on different types of food to achieve ideal cooking results, enhancing flavor during grilling and frying
- High-power heating elements, evenly distributed, fast heating and uniform temperature distribution
- High temperature safety limit.
- Large-capacity, movable grease drawers (7 L each) on both sides.
- 1 inch (25.4 mm) thick griddle plate to avoid thermal deformation; also act as heat reservoir to avoid temperature plunging low during mass food preparation
- Steel griddle plate with optional hard- chrome plating.

Model	Description	Dimensions (mm)	Power
GHC24-J	24", Counter top, electric, computer control, steel griddle plate	740 x 946 x 456	380 V, 50 Hz, 10 kW
GHC36-J	36", Counter top, electric, computer control, steel griddle plate	1044 x 946 x 456	380 V, 50 Hz, 15 kW
